School Management System

All-in-one School Management System

Using Schoolna you can get rid of your fragmented IT infrastructure. We provide a modular, cloud-based platform that offers cost effective solution for the administration of schools of any size. That's because Schoolna combines the functionality of admission, registration, billing, scheduling, grade book and Bus Management in addition to Mobile Application for Parents, Students and Teachers.

Schoolna is redefining the educational experience with its various modules that fully support the school daily operations, allow digital monitoring of daily activities along with managing all the resources and information on a single platform.

No need for main features

Please visit our website for more information about the product:

Board G

Invest the time and effort of your board member

BoardG is a platform that facilitates the work of both Board Members and Board Secretary. It integrates all the important functions of the Board that usually require vast efforts, excess time and continuous follow-up from the Board Secretary and the Members, automates and combine them with CMA Bylaws, creating a one-stop system that enables them to reduce effort, save time and avoid mistakes and penalties significantly.

Features are not organized very well; we need to have them organized in a different way even if we put them in another slide
